WHAT IS LEXVERIFY?

Lexverify is a real-time AI-powered assistant that helps prevent legal, compliance, and cyber risks on electronic communications in real time.

Our solution scans electronic communications content for legal and compliance breaches, alerting users about potential risks before hitting the send button.

Our admin dashboard provides Risk & Compliance teams with real-time visibility into their organisation's compliance posture.

Our Mission

To make risk prevention as easy as spell checking.

**EMPLOYEES FORGET 50%
OF TRAINING CONTENT
WITHIN AN HOUR AND
70% BY THE NEXT DAY**

WHAT IS THE PROBLEM?

As a Risk & Compliance team, you are tasked with ensuring that your organisation is not only compliant with all relevant laws and regulations, but that you can also evidence it to your board and other stakeholders.

Ever-evolving list of laws & regulations

- Keeping up to date with these can be time consuming.
- Non-compliance can attract lawsuits and regulatory investigations, causing financial loss and reputational damage.

Current approaches are reactive and ineffective

- Most risk management solutions are reactive and focus on identifying risks after they have occurred (e.g., surveillance).
- Research shows that employees forget 50% of training content within an hour and 70% by the next day.

One is all it takes

- It only takes one mistake, one mishap, one bad actor to put your organisation at risk.
- Real-time, proactive compliance on your electronic communications is essential.

10,000 emails are sent on average by an office worker every year

WHY LEXVERIFY?

As the Risk & Compliance team, nothing is more important than implementing all the necessary measures to prevent any compliance breaches from occurring within your organisation.

Protecting your organisation from regulatory investigations and negative publicity is your top priority. You want to avoid costly regulatory fines and the negative publicity that comes with this.

Lexverify makes risk prevention as easy as spell checking.
